Introduction

We are one of a leading manufacturer of compressive range of graded Ferrous casting parts for Automobile-Transmission-Earth Moving-Valves-Pumps-Pipefitting-Railway-Defense-Valve- as per customer drawings or sample.

We are specialized in manufacturing various grades of Ductile Iron/S.G Iron & Cast Iron.

We are a regular supplier to O.E.M.'s by direct or indirect means.

While making hundreds of different castings every year, our success is ultimately measured by one goal: CUSTOMER SATISFACTION.

Our continued growth has been driven by the relationships we have with our customers. While we strive to get each new casting right on the first run, what matters more is our ability to creatively solve challenges. We work closely with our customers from the prototype stage to production runs to emergency shortages. Our production system has been built on versatility and responsiveness. The process and systems we use continue to evolve supporting the need for ever advancing materials, requirements and designs.

If you think our organization can match your needs, give us a chance to explore our technology, which could be our chance to be a part of your team.
